

In The Specification:

The Specification was amended to add headings, correct punctuation, and move the Abstract to the end of the application, to comply with US patent practice. It is believed no new matter was added by these amendments.

The following claim of priority is added at the beginning of the application: "This application claims benefit, under U.S.C. §365 of PCT/FR03/002048 filed July 2, 2003."

A Substitute Specification is attached incorporating these amendments.

Abstract:

The following Abstract – matching the Abstract on the face of the PCT/FR2003/002048 application:

"The invention relates to a formulation and a method for production of a material from an epoxy resin and a rheological control agent, which may be processed by means of the techniques for working thermoplastics yet with the capacity to react and form a thermosetting material with good shock-resistant properties."
